PROFESSIONAL SUMMARY

I am a newly graduated Information Technology engineer with nearly one year of professional experience at NCC Plus Vietnam and current work as a Teacher and Software Developer at HP Edtech Center. I have a background in backend development, databases, and fullstack web applications. At NCC Plus, I contributed to Speedydd, the document authentication system used between the European Union and partners outside the EU. I communicate in English, work well with teammates, and always actively learn and share knowledge.

SKILLS

Programming: JavaScript, Node.js, Express.js, ReactJS, NextJS | Database: MongoDB

Tools: Git, Docker, Vite, Axios, ChatEngine | Other: REST APIs, Google Authentication, LLM integration

Languages: English (listening, speaking, reading, writing)

WORK EXPERIENCE

Teacher & Software Developer | HP Edtech Center 08/2026 - Present

- Teach and develop educational programs in Computer Science and Information Technology.
- Develop and maintain web applications and educational platforms for teaching and student engagement.
- Design AI-powered solutions and integrate Large Language Models (LLMs) into applications.
- Build internal software tools to support teaching and educational management.
- Design learning materials, practical exercises, and technology-based learning activities.
- Provide technical support and optimize digital tools used in educational operations.

Node.js Intern | NCC Plus Vietnam

07/2024 - 04/2025

- Participated in Speedydd, a document authentication platform for businesses and joint ventures in the European Union and outside the EU.
- Worked in an 8-member team using NextJS, Express, and MongoDB to deliver backend and related web features.
- Implemented Google authentication so users could log in and access the system securely.
- Developed the monthly payment function for each individual participating in a company.
- Implemented the My Job function for business administrators to manage work assignments.

PROJECTS

HP Edtech Center Website | Fullstack Developer

08/2026 - Present

Developed a website for HP Edtech Center to support educational activities, course management, and student engagement. Designed and developed the web application, implemented user-facing features, and integrated digital tools to improve the learning experience.

Speedydd | Backend Developer

09/2024 - 04/2025

Team size: 8. Technologies: NextJS, Express, MongoDB. Speedydd is a document authentication system used by European businesses and EU joint ventures. Built Google login, monthly payment for individual participants, and the My Job function for business administrators.

Realtime Chat | Fullstack Developer

09/2024 - 12/2024

Technologies: ReactJS, Express, Axios, Vite, ChatEngine. Built a realtime chat website for texting and exchanging simple files, focusing on user interface, API integration, and realtime communication.

EDUCATION

Quy Nhon University

2021 - 2025

Information Technology - Specialization: Information System. Very Good. GPA 3.23/4.00

ACTIVITIES

Youth Assault IT Department

2021 - 2023

Position: Member of Communications Board. Designed photography, posters, cards, banners, and edited videos. Participated in volunteer activities such as Green Summer and beach cleaning.

INTERESTS

Explore new technology trends, learn English, listen to music, and read books.
